

South Eastern Fabricare Association (Drycleaning & Laundry Institute partner in Georgia)

South Eastern Fabricare Association (SEFA) has arranged for Jane Zellers to present two, one-day programs starting with a Shirt and Drycleaning Finishing on Saturday, February 25 at the Unipress Facility in Tampa, FL. The second will be a combination of Stain Removal and Drycleaning Finishing on March 11, in the West Palm Beach area.

Shirt Laundry and Drycleaning Finishing

On Saturday, February 25, those who attend this program will learn how to produce a quality-finished garment in drycleaning and laundry. You will also learn how to set production standards for your drycleaning and shirt laundry departments. Jane will explore the need and procedures to set individual, departmental and plant pieces per hour (PPH).

Every employee has a PPH to achieve and when you manage your production floor, decrease your labor hours and increase your profitability, you will begin to achieve your potential. Jane will draw on her years of experience to explore the importance of workflow and proper equipment placement, and the need to perform scheduled maintenance for all drycleaning and laundry equipment. This is an intense, hands-on technical workshop.

Stain Removal & Drycleaning Finishing Workshop

In the morning of Saturday, March 11, Jane will use a combination of classroom and hands on training to explore the complex chemistry of professional stain removal. Then in the afternoon, she will focus on the finer points of drycleaning finishing. Hands on instruction means that you will learn by doing -- not just by watching the expert. You will actually be working under the trained eye of one of the industry's foremost expert trainers.
